

FTSE 100 VS S&P 500: 10-Year Risk & Return Dashboard

FTSE Total Return		S&P 500 Total Return		FTSE Volatility		S&P 500 Volatility
66.57%		243.78%		12.17%		15.36%
Correlation	0.61					

Over the 10-year period, the S&P 500 significantly outperformed the FTSE 100, with a total return of 243.78% compared with 66.57%. The S&P 500 had slightly higher annualised volatility, meaning It delivered stronger returns but with higher risk. The correlation of 0.61 shows a moderate positive relationship between the two indices. Overall, the analysis suggests that US equity exposure produced stronger long-term growth than the UK market during this period
